

Dear Eleni,

My name is Maria Kalorkoti and I am a first grade student in Paralimni Gymnasium. Since 2014, I have been participating in a Comenius project with the title "Roots And Wings". Part of my work is to research about your city, Stockholm.

First of all, I learned that Stockholm is the capital of Sweden, with a population of 2.2 million. I also learned that the name means "multi between bridges". Is it true?

Is it true that approximately 27% of Stockholm's residents are from immigrant families?

Researching about higher education in your city, I learned that Stockholm has many universities and colleges such as the Stockholm University, and the Royal Institute of Technology and the famous Royal College of Music. Is it true?

Furthermore, I was impressed reading about the history of Vasa Warship and the Vasa museum. I read that Vasa museum was built around the Vasa Warship. The museum opened its doors in 1990. Is it true?

I was fascinating reading about the most famous attraction, the Abba museum. Abba museum is dedicated to the pop-group ABBA that won the EU Song contest. Is this correct?

Stockholm weather is very cold during winter and not that hot during summer. Is it true?

Best regards

Maria Kalorkoti
